Re: Red Zebra Broadcasting Licensee, LLC
WWRC (AM), Washington, DC
Facility Identification Number: 8681
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed October 1, 2009, on behalf of Red Zebra Broadcasting Licensee, LLC ("RZB"). RZB requests reinstatement and further extension of the special temporary authority ("STA") originally granted to former licensee AMFM Radio Licenses, LLC, ("AMFM") on July 14, 2006, and modified on September 19, 2006, to operate Station WWRC with parameters at variance and/or reduced power while maintaining monitor points within licensed limits.¹ In support of the request, RZB states that repair of damages caused by a tenant are the responsibility of AMFM, pursuant to the Asset Purchase Agreement between AMFM and RZB. RZB states that the daytime operation has been restored to licensed parameters but that additional time is required for restoration of the nighttime pattern.

We note that the previous STA expired on March 8, 2009. Our review indicates that the circumstances presented warrant grant of STA in order to provide for service to the public, and that the requested STA facilities are the same as were previously authorized. However, in light of the lapse of time between the expiration of the prior STA and the filing of the instant request, it will be considered as a request for a new STA; the authority granted will not cover the period between the expiration of the prior STA and the filing of the instant request.

Accordingly, the request for STA IS HEREBY GRANTED, with conditions as discussed above. Station WWRC may operate with parameters at variance and/or reduced power while maintaining monitor points within licensed limits. It will be necessary to further reduce power or cease operation if complaints of interference are received. RZB must notify the Commission when licensed operation is restored.² RZB must use whatever means are necessary to protect

¹ WWRC is licensed for operation on 1260 kHz with 5 kilowatts daytime and 5 kilowatts nighttime, employing different directional antenna patterns daytime and nighttime (DA-2-U).

² See 47 CFR §§ 73.45(c), 73.51, 73.54, 73.61(b).

workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310. The authority granted herein does not cover the period between March 8, 2009, and October 1, 2009, and is without prejudice as to whatever action the Commission may take with respect to operation of Station WWRC during the foregoing period.

This authority expires on **April 23, 2010**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller", with a stylized flourish at the end.
